ACADEMIC ADMINISTRATION

1993-2006: Director, Division of Resource Management, West Virginia University

Led three academic programs (Agricultural and Extension Education, Agricultural and Resource Economics, and Landscape Architecture) offering B.S., M.S., and Ph.D. degrees. Responsible for budget and personnel, internal and external relations, curricula and accreditation, student recruitment and retention, facilities and laboratories, fundraising. 368 students, 20 tenure track faculty, and 5 staff members.

- Based on the 2005 Faculty Productivity Index, Academic Analytics ranked Program in Agricultural and Resource Economics eighth in the United States. Based on survey of employers in 2005-06, Design Futures Council ranked B.S. in Landscape Architecture thirteenth in the United States.
- Turned declining enrollments around. Undergraduate enrollments increased by 44% fall 1993 to fall 2006 (22% from fall 2002 to fall 2006). Total enrollment increased by 24% from fall 2002 to fall 2006, more than twice as fast as the college and almost 60% faster than the university.
- Consolidated Program in Agricultural Education and Program in Agricultural Technology into Agricultural and Environmental Education, which later became the Program in Agricultural and Extension Education.
- From FY 1994 to FY 2006 more than doubled inflation-adjusted budget.
- Endowments grew from none in FY 1994 to 9 in FY 2006 with total value of \$300,000, and one pending (endowed in 2007).
- Working with legislative liaison, received funding from state legislature for tenure-track faculty line to support WV Community Design Team, effective FY 2007.
- Spending from externally funded projects (in 2006 dollars) grew from \$185,000 in FY 1994 to some \$1.0 million. Funded grants initiated by division faculty increased from \$55,000 in AY 1994 to a high of \$1.4 million in FY 2004 and averaged \$940,000 over the last three FYs of my tenure.
- Strategic investment in research resulted in the establishment of the Natural Resources Analysis Center (NRAC) that, in 2010, became a college-wide center and provided the foundation for the successful pursuit of a \$15 million multi-institution award in 2010 from the U.S. Department of Energy.
- Renovated one design studio and replaced a second one with a new studio. Investments in these facilities and in faculty resulted in higher rankings of instructional programs, particularly in Landscape Architecture.
- Provided leadership for the Ph.D. in Natural Resource Economics program that was approved by the WVU Board of Governors in 1992. During the program's early years, organized student recruitment, worked on program administration and review, and curriculum changes that helped grow the program.
- Mentored junior faculty members and obtained a 100 percent success rate for promotion to associate professor with the award of tenure. Increased faculty diversity while also increasing research accomplishments.
- Consolidated the four programs that existed in 1993 when I assumed the division leadership into three programs and enhanced collaboration across program lines, particularly in research.

2004-2006: Director, Division of Family and Consumer Sciences, West Virginia University

During a transition period in the College of Agriculture, Natural Resources and Design, accepted leadership for a division consisting of four academic programs (Child Development and Family Studies, Food and Human Nutrition, Interior Design, and Textiles, Apparel and Merchandising), offering B.S. and M.S. degrees. Responsible for facilitating move of Program in Food and Human Nutrition to another administrative unit in the College and working with the faculty on a vision for the remaining three programs. 12 tenure track faculty, 2 staff members, and 453 students.

- Worked with faculty to establish distance education Early Childhood Director Credential program.
- Facilitated establishment of 2+2 Child Development-Birth-to-Five teacher certification program between Fairmont State Community and Technical College and West Virginia University.
- In partnership with university, college, and Division of Resource Management, built new interior design studio. In collaboration with Division of Forestry and Natural Resources, established textiles testing laboratory.
- Achieved enrollment growth in study abroad summer programs, particularly a program in design in Italy in collaboration with faculty members from Italian institutions.

1988-1993: Director, Urban and Regional Planning Program, University of Colorado

Responsible for leadership of an accredited professional master program. Helped establish strong ties to the state's professional planning community, especially by working cooperatively with and through the Colorado chapter of the American Planning Association. Represented the program within the School of Architecture and Planning and on the University of Colorado's Denver campus.

- Initiated, led, and implemented revision of Master of Urban and Regional Planning (MURP) curriculum. Developed joint MURP-MPA (Master of Public Administration) program
- Renewal of accreditation of MURP by national Planning Accreditation Board with all criteria fully met
- Served on the team that brought about merger of School of Architecture and Planning, University of Colorado at Denver and College of Environmental Design, University of Colorado at Boulder in 1992
- Initiated process to integrate planning faculty members on the two campuses into one program, which resulted in the establishment of Ph.D. in Planning and Design in 1995, a program that has achieved success
- Forty-five percent enrollment growth in the master program (MURP) between 1988 and 1993
- Fundraising: (1) Colorado Chapter of the American Planning Association funded annual scholarship (\$500/year), and (2) raised David R. Hill Scholarship endowment (\$10,000); there was no previous record of fundraising and the David R. Hill endowment was the first endowment created in the program
- Worked with leadership of the Colorado Chapter of the American Planning Association to build a strong relationship with the professional community in Colorado, as expressed in internship placements, professionals serving as mentors to students in the program, fundraising, support during accreditation renewal process, formation of a GIS support system to assist communities making equipment and software decisions, and student participation in the Colorado Chapter's annual conference

RESEARCH

(Names of former and current students are underlined)

Research Interests

Economic policy, particularly (1) regional and rural economics and development; (2) international labor migration; (3) domestic job and occupational mobility; and (4) natural resource management issues related to amenities, planning, and energy, and their implications for economic development. I am also interested in economic philosophy and the development of economic thought.
